

# The Accredited Trueline™ Agent

*High accuracy through advanced measuring technology from Trueline™*

High accuracy through advanced  
measuring technology from  
Trueline™

## Imagine ...

you could have a door come to site  
pre finished, pre painted  
with all locks and hinges cut out  
and ready to Install.

**Well now you can!**

With the Trueline™ door system you are ensured of:

- ▶ An exact fit, first time, every time, guaranteed.
- ▶ No noise, dust, or fumes typical with traditional fitting.

## Trueline™ Agent

## Choose the Trueline™ Advantage

The Trueline™ door system is increasingly specified by commercial building owners as their preferred choice when installing doors. Ready to fit perfectly, the doors come with preparations for lock and hinges cut out and micro chipped for future identification. Perfect for all door types including fire rated, solid core, double doors, metal clad or any other door. You can choose to have your doors come to site painted to any colour of your choice and we can even match existing colours.

This results in an exceptionally clean installation without issues of dust, noise and other potential health and safety issues which may otherwise impact your business.

## Perfect for all applications:

In hotels, we can replace the doors, pre painted, faster than the maid can clean the room. The room can then be let the same day with no down time saving costs and disturbance to your client.

In hospitals, high rises and shopping centres the Trueline™ door system again provides the perfect solution. No dust, noise or smell of fumes from paint, no workplace health and safety issues with slippery floors from saw dust, no electrical leads on the floor.

In banks or units requiring high security the Trueline™ door system ensures no security issues or unattended door openings during door replacement. Old door comes off, new door goes on.

*“All backed by the highest quality of workmanship and customer service that is characteristic of Trueline™”*
